

SPECIALIZED IN QUALITY CONTROL

on clothing and accessories

ABOUT

THE COMPANY

Our company was born out of a passion for fashion and an awareness of the importance of offering end consumers garments and accessories that meet strict criteria for excellence. Attention to detail, precision in testing, and a commitment to perfection are the values that guide our daily work. Our goal is to protect and enhance the image of the brands we work with, ensuring that every product placed on the market lives up to expectations in terms of quality and durability. We firmly believe that quality is not just a goal, but an ongoing process that requires constant attention and uncompromising commitment.

CHECK
quality control

QU.
CO|

Depending on the customer's needs, we carry out quality control on the garments, which can be statistical (% or AQL) or involve the entire batch (100%), to ensure the final consumer the conformity expected by the brand standards.

SERVICES

REPAIRING

Our repair service on knitted garments is designed to restore each piece to its original condition. Thanks to our experience, we are able to work on all kinds of defects, from small imperfections to the most significant damage, ensuring flawless results. We understand the importance of every piece of knitwear, so we treat each item with the utmost care and attention to ensure that repairs are long-lasting and virtually invisible.

SERVICES

RECONDITIONING

Based on customer needs, we carry out envelope packing replacements and label and barcode application.

We take in clothing items that stores have not sold or that have been returned by customers.

Often textile items no longer have the original packaging, have additional labels affixed by the retailer, or need to be folded and ironed properly.

Our goal is to make them as good as new, as if they had just come off the production line.

Specifically, we take care of:

IRONING / FOLDING / REPAIRING / LABEL CHANGING /
REPACKAGING / PACKAGING.

SERVICES

TRACKABILITY

In the dynamic and competitive world of apparel and accessories, traceability has become an essential element to ensure transparency, efficiency and safety throughout the production chain. To meet these needs, we offer an advanced traceability service with RFID (Radio Frequency Identification) and NFC tag reading via TEMERA system, which allows each garment to be tracked accurately and in real time.

SERVICES

LOGISTICS

We offer warehousing services that involves precise and methodical handling of goods. Each item is carefully divided by size and color, ensuring efficient organization and quick access to products. This subdivision maximizes space and minimizes search time, making the inventory management process smoother and more accurate. Order preparation for stores is another strength of our service. Our team takes great care in selecting and assembling the required items, reducing delivery time and improving customer satisfaction.

SERVICES

SCRAPPING GARMENTS

In keeping with sustainability and brand protection requirements, we offer a 100 percent garment scrapping service, which includes the careful removal of all brand labels and accessories. This process ensures that discarded or unsold products are disposed of safely and responsibly, avoiding any risk of unauthorized reuse or damage to the brand image.
